

Bin liners & labels

All food and garden waste belongs in your green organics bin. If you are using a kitchen caddy, it's very important to line it correctly or our green waste becomes contaminated.

Confusing terms on labels make it hard to know which bin liner you can use. 'Degradable' or 'biodegradable' bags CANNOT go in your green organics bins – only compostable bags can be used.

As a general rule, only use bags that are labelled Australian Standard Certified Compostable. Look for AS 4736 and a seedling logo.

You can purchase our 100% compostable liners from our Corporate Centre in Goonellabah, Lismore Revolve Shop and our Lismore and Nimbin Visitor Information Centres.

Using your kitchen caddy *what can you line it with?*

A certified compostable liner?
YES

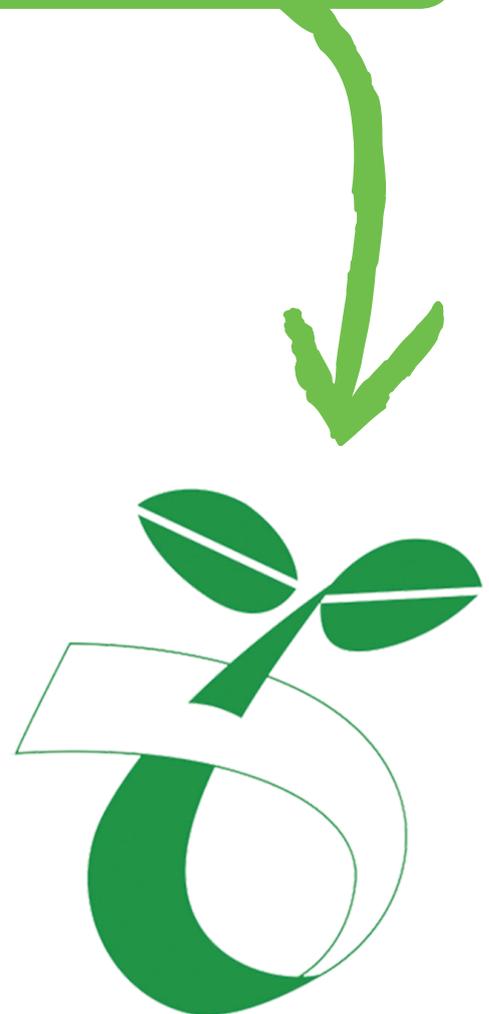

Newspaper?
YES

Nothing?
YES

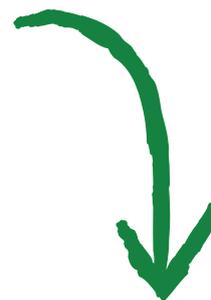

Plastic, degradable & biodegradable bags
NO

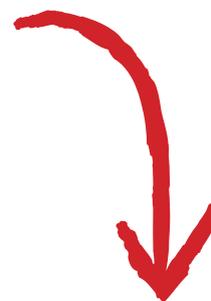

Compostable
AS 4736
