

SITE ACTION PLAN:

Priority 1 PLANS

Where?  Zone/Area (mark on a map)  Size of area/Length of waterway.	What?  Physical problems do you see? such as: soil loss, weed invasion, uncontrolled cattle access to creek, loss of pasture species, loss of woodland birds	Why? Environmental values or ecological impacts of concern?  For example: loss of habitat, poor water quality, loss of riparian vegetation. And list any High Conservation Values that will be protected or enhanced	How? Planned Action – what best-practice can be applied?  Describe how you will address the Issues – techniques and on-ground actions. Include measurable outcomes (e.g. length of fences installed, area and density of weeds controlled, numbers of trees planted).	Who?  Will be involved in projects?  Family, neighbours, staff?  Do you need to engage professional help?	When?  Start times and maintenance  Consider seasons and follow-up treatments.	How much?  Estimated Costs and other resources needed  For each item and in-kind time commitments	How success will be measured?  Monitoring measures such as photo points.

General: Is there any relevant Legislation that needs to be considered before taking any action?
