

# Getting started with the mapping tool waterRIDE LITE

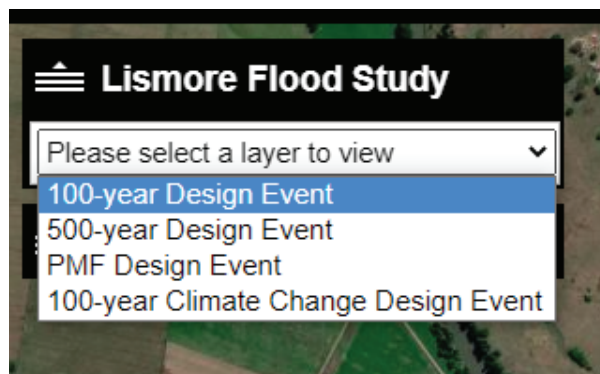

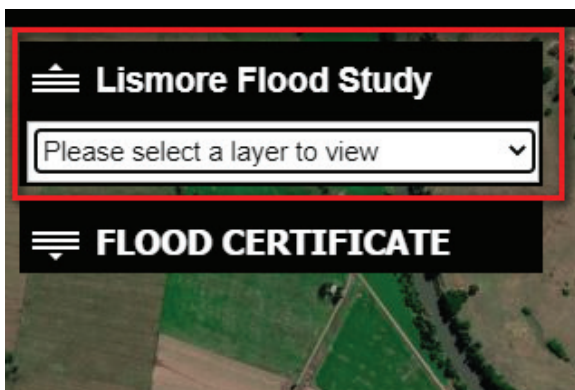

## Changing the background view

The top right-hand corner of the application will give you options to change the background imagery. Council suggests using the Road or Aerial views.

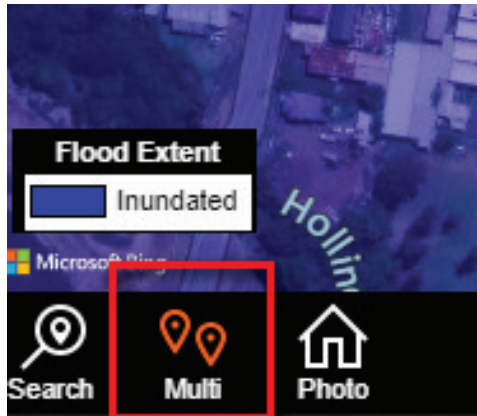

## Accessing flood information

Select a flood event by accessing the drop-down menu under the **Lismore Flood Study tab** on the left-hand side of the application. Please note this application shows design flood events to be used for general information and planning (development applications etc) and does not include the 2022 event.

Use the **on-screen pointer (hand icon)** to select a point within the flood extent area (blue shading) to show you the flood level and flood depth at that point.

You can select the **Multi** tool in the lower left-hand corner of the application to view the levels for multiple chosen points.

The **Search** function in the lower left-hand corner of the application can be used to search for a specific address.

## Generating a Flood Information Certificate

**Step 1:** Open the Flood Certificate tab on the left-hand side of the application and either click a property on the screen or enter in the address of the property.

**Step 2:** Enter in a valid email address.

**Step 3:** Click on Go and the flood information certificate will be emailed directly.

Please note it can take a few minutes for the flood information certificate to come through.
