

Community Update Tuntable Falls Area

Background

Tuntable Falls Road, Newton Drive and Upper Tuntable Falls Road suffered significant damages in 2022. Funding was secured to restore these roads in 2024, and landslip remediation works have already been completed at five sites.

Upcoming Works

Additional works are now scheduled, including sealed road surface restoration in two key locations on Tuntable Falls Road and Upper Tuntable Falls Road from mid to late 2026, followed by landslip remediation of Tuntable Falls Road in early-mid 2027.

Outside of this, Council will continue to maintain Tuntable Falls Road, Newton Drive and Upper Tuntable Falls Road as part of our routine roads program.

Traffic and Community Impacts

Works Notifications with details on anticipated traffic changes and community impacts will be distributed to impacted residents closer to construction.

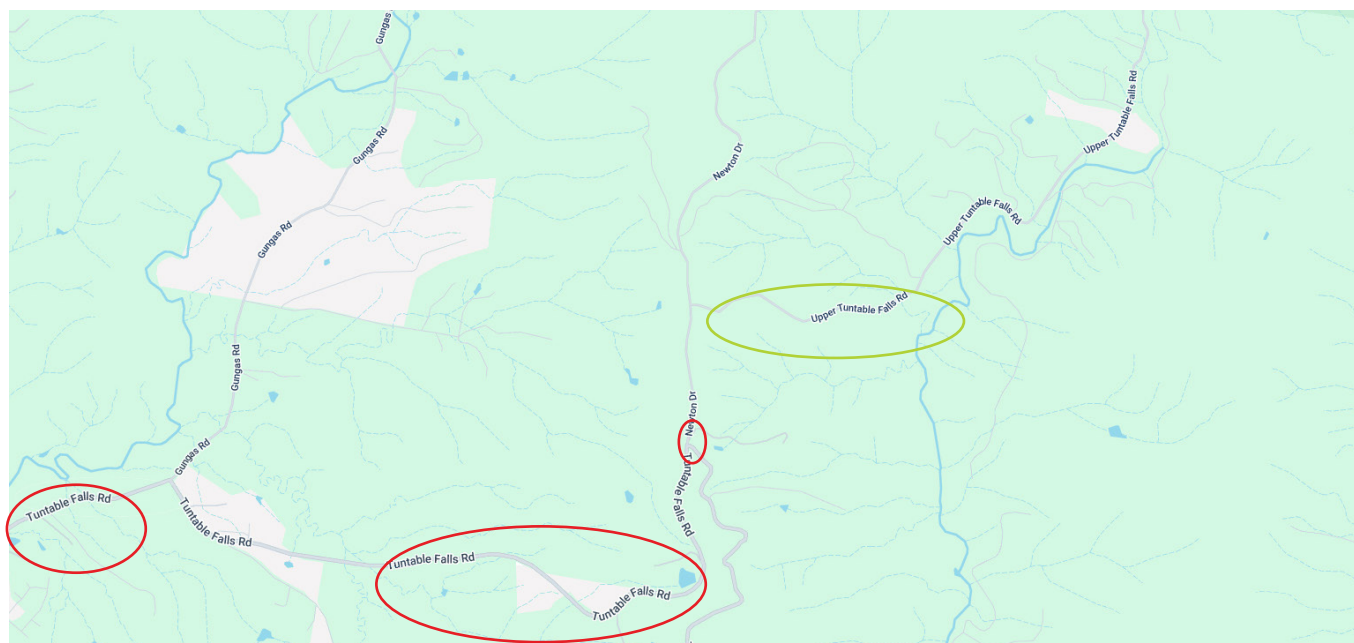

Further Information

For additional information on this and other flood restoration projects:

- **Subscribe** to Flood Restoration Portfolio updates at www.lismore.nsw.gov.au/frp-notifications
- **Follow** Lismore City Council on Facebook, LinkedIn and Instagram
- **Visit** www.lismore.nsw.gov.au and search Flood Restoration Portfolio
- **Email** council@lismore.nsw.gov.au
- **Phone** 02 6625 0500

To help residents and visitors understand the planned impacts and timing of works, Council has developed an interactive schedule and map, allowing users to view locations and proposed start and completion dates.

To view the online schedule and map, visit lismore.nsw.gov.au/landsliprestoration or scan the QR code below.

Approximate locations of scheduled road works:

red = sealed road surface restoration, **green** = landslip remediation
